

Caritas
Baby Hospital
Bethlehem

December 17, 2021

Dear friends and supporters of Caritas Baby Hospital,

Despite the few won battles against the vile COVID-19, humanity is still suffering for the second year from the pandemic and its consequences. Bethlehem in particular lies under a huge financial and social stress resulting from the restricted tourism and pilgrimage in the region; the main source of income for the locals.

Nonetheless, we are very proud to say that Caritas Baby Hospital is still faithful to its mission by being there for the sick children and their families. Our team was able to provide thousands of paediatric treatments in addition to psychosocial support sessions during 2021.

Additionally, in cooperation with local and international partners, CBH continues to lead the local efforts to ensure patients' safety and infection control within the Palestinian healthcare facilities amongst the pandemic and harsh infection season on adults and children.

We are also very honoured to say that up until August, our team and facilities were still offered to the Ministry of Health in support of the diagnostic services for the COVID-19 and protecting the local community.

On the hospital development level, we have launched the upcoming strategic planning CBH 2025- Reinventing the Future. This project aims at guiding CBH towards reaching its full potential to help our Palestinian children and community. It will help us also to look back and review our processes and enhance our services especially as we are still facing the aftermath of COVID-19.

As we come close to the end of the year, allow me to extend my gratitude and appreciation to our mother organization; Children's Relief Bethlehem and to each and every contributor to CBH existence. Without your unconditional support, we wouldn't have been able to relief the pain of many children and comfort their families. Season's Greetings to all and best wishes for a very safe and peaceful new year.

Kind regards from Bethlehem,

Issa Bandak
Chief Executive Officer
